

AccuFeed™ for the AMX 1000s

PRECISION FEEDING. SIMPLIFIED.

TAKE THE GUESSWORK OUT OF FEEDING

AccuFeed™ for the AMX 1000s puts precision feeding on autopilot. One touch delivers perfectly placed, evenly distributed feed—every time. Less waste. Less time. More consistency.

Technology Focused

AccuFeed™ pairs advanced automation with intelligent guidance to deliver feed precisely where it's needed, every time. Smart technology controls placement and speed for consistent distribution, less waste, and maximum efficiency.

Automated Feed Unloading Start. Sit Back. Feed Perfectly.

Start the feeding process at the touch of a button and let AccuFeed™ handle the rest. The system automates feed delivery from start to finish, ensuring every load is distributed consistently and accurately. This hands-off approach saves time, reduces human error, and delivers repeatable results day after day, giving operators confidence and making feeding easier than ever.

Hands-Free Steering Accuracy

Visual guidance automatically steers the AMX 1000S along feed bunks or barn alleyways—within inches of the intended feed line.

Even Feed Distribution

Matches vehicle speed to the target unload rate to place the correct amount of feed evenly over the entire length of the pen.

* AccuFeed™ technology is only available on the AMX 1000s Self-Propelled TMR Mixer

Pen ID Tags

Pen Identification Tags ensure AccuFeed™ feeds the right pen, the right amount, every time—automatically calculated by weight and bunk length.
